

**MetroCount®**

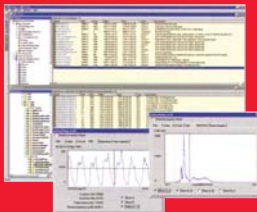

VEHICLE CLASSIFIER  
SYSTEM

- For Use With Our Galaxy Series Of Radar/Message Trailers

- **Traffic Executive Software** for Windows® provides you with a complete vehicle classifier system.

Certified ISO 9001

800-428-4315

Along with the Galaxy™ Series of Radar/Message Trailers, the MetroCount® Vehicle Classifier System combines state-of-the-art traffic logging hardware with powerful, yet easy-to-use software. MetroCount provides you with a total solution to all your traffic monitoring issues, from routine statistics through to the most complex traffic management problems. Matched with the Decatur Electronics'  Series of Radar/Message Trailers, the MetroCount Vehicle Classifier System completes your traffic safety and vehicle count and classification package.

**The MetroCount Vehicle Classifier System:**

- Can be mounted inside the Galaxy Radar/Message Trailer or used as a stand-alone product...and it's waterproof!
- Gives you the ability to record class, speed and volume reports and exact detail such as individual axels.
- In addition to providing 85<sup>th</sup> speed percentiles, retains the software data about every individual vehicle.
- Gives you the ability to select the report or data type you need.
- Provides you with easily generated reports and graphs with speed statistics, volumes, classes, and gaps.
- Provides the ease of use for down loading information to a desktop or laptop computer. *Traffic Executive™* software for Windows is included in the package.
- Includes a pneumatic tube sensing method design which provides for accuracy and reliability.
